SunSystems in the Cloud

One-Stop Provision of Software, Hosting, Support and Services for SunSystems

Whether you are an existing SunSystems user requiring a hosted environment or you are considering purchasing SunSystems hosted in a cloud environment, our one-stop provision caters for all.

FinanSys Cloud, managed by the leading SunSystems partner, provides a low-cost, resilient cloud infrastructure for your SunSystems environment without hidden fees.

Why choose FinanSys Cloud over self/third-party hosting?

- **No in-house IT required** – we monitor and maintain everything from your users, to patching Sun and updating the environment so you can focus on your business.
- **A complete disaster recovery solution** – back-ups are taken every 15 minutes and data is held across three servers in two data centres to ensure minimal loss in the event of a disaster.
- **24/7 Access and support from Sun experts** – the environment is supported and maintained by staff who understand SunSystems and we guarantee 99.96% uptime.
- **No hidden fees** – all required software licences for SunSystems are provided: Microsoft Server, Office, perpetual SQL (with assurance), RDP, Active Directory and Citrix is standard as is all inclusive bandwidth.
- **Save money** – the economies of scale provided from our hosting environment mean we provide customers an affordable, resilient and all-inclusive hosting offering with simple pricing.
- **Security at the heart** – our single-tenanted, ISO27001 offering provides you piece of mind for your data and with all our data centres being located within the European Economic Area, we can help ensure GDPR compliance as well!

Testimonial

“Salix does not have a dedicated IT department so Hosting has offered us less risk with back-ups and maintenance all being taken care of. Having previously used another hosting provider we have found it to be beneficial switching to FinanSys being our SunSystems support partner as a one stop shop. To date we have not experienced any hosting issues.”
