

SunSystems Business Intelligence

Sophisticated budgeting, planning, forecasting, consolidation and reporting

Sophisticated budgeting, planning, forecasting, consolidation and reporting

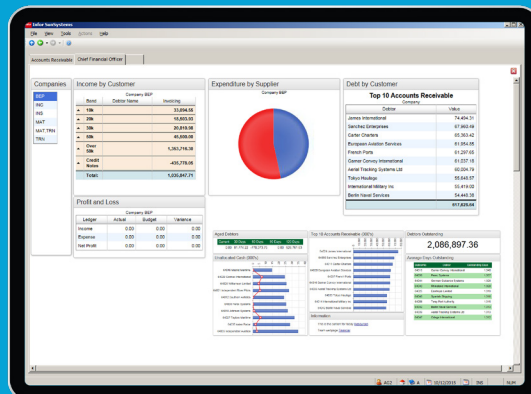

Organisations need targeted, timely and accurate information - information that can successfully drive strategic and tactical decisions.

Too often, the information they need is located in inaccessible silos of data. Too often, that data is only available in a form that makes it difficult to understand and interpret.

SunSystems Business Intelligence offers a pre-built application to streamline the collection of budgeting, forecasting and planning data from across the organisation, whether it be from other operational systems or stakeholders across the organisation. SunSystems Business intelligence offers:

- Built-in workflow to manage and control the planning process to support continuous budgeting and rolling forecasts.
- Production of consolidated financial statements with intercompany eliminations and translation of data using different accounting methods into the same currency and accounting treatment.
- Broad access to insights via flexible, self-service design dashboards and reports; accessible on the go reducing the costs and time of sharing information throughout the organisation.
- Seamless integration with other operational systems allowing a complete view of the company.
- Out-of-the-box structures to support common planning requirements and structures with the flexibility to mirror your organisation's specific requirements

At a glance

SunSystems Business Intelligence offers:

- Streamlined budgeting & forecasting collection with comprehensive, on the go, reporting & planning.
- Automatic consolidation of multiple sets of books from multiple systems and companies including eliminations & data transformations
