

Dashboards for SunSystems

An instant access to management information via the web

An instant access to management information via the web

Organisations around the world are quickly adopting dashboards as a means to provide easily digestible management information for daily and long-term operations.

At its heart, a dashboard provides the end user with a snapshot display via a web-browser of the most important information to provide insight and monitor the performance of your organisation.

Dashboards for SunSystems provides you:

Instant, secure, online access to view live management information to allow you to make fast and accurate decisions.

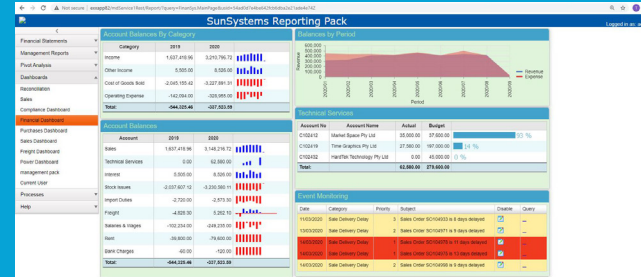

Easy design and maintenance of dashboards with the data models predefined allowing users to build reports without the need for technical skills

Seamless drilldown functionality to enable end users to easily delve into the information and reveal further analysis.

The complete picture of your organisation with the ability to report against data from other business systems.

An intelligent metadata layer which supports security, business rules, hierarchies and calculation fields.

At a glance

Dashboards for SunSystems provides:

- Web access to management information
- A live view of your organisation's performance
- Out of the box drilldown functionality to explore the figures
- Easy report design and maintenance for end users
