

SunSystems Reporting

Real-time information to make the right decisions at the right time

Real-time information to make the right decisions at the right time

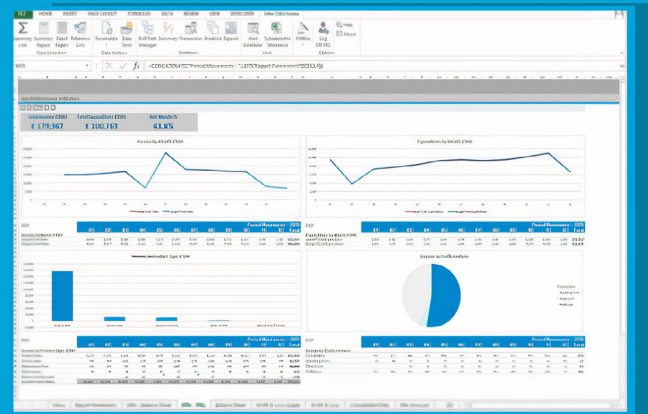

Knowing what direction to take in business is essential. Whether it is acquiring new companies, launching new products, finding new ways to beat the competition, or other avenues of pursuit, it's important to know where you're headed and why.

With SunSystems Query & Analysis (formerly Vision), anyone in your organization can get 24/7 access to real-time information to make the right decisions at the right time. Key features include:

- User friendly screens for technical and non-technical users alike to generate and update reports.
- Excel integration out-of-the-box means users can get up-and-running quickly with minimal training.
- See behind the figures with powerful drill-through, breakout and expand functionality.
- Real-time access to non-SunSystems data via user-definable data links.
- Publish reports to the web for easy end-user access from anywhere.
- Easily analyse trends, problems, and opportunities that are often concealed within your organisations' transactional data.
- Full support for SunSystems' powerful multicurrency setup.
- Automatically manage, run, and distribute reports based on scheduled events.

- Enhanced user roles controlled in Ming.le via Infor Federation Services (IFS)
- Enhanced Report Designer capabilities

At a glance

SunSystems Q&A reporting provides:

- Real-time access to data to support decision making
- Publish reports to the web for easy end-user access
- Excel Integration out-of-the-box
- Automate the running and distribution of reports based on a schedule or trigger event

What are the next steps?
