

Infor SunSystems from FinanSys

Powerful financial accounting used by over 9,000 companies in 190 countries

Make better financial decisions

SunSystems is a premium financial management solution designed to centralise and streamline all your financial processes. The system is highly scalable with companies ranging from a single user to companies with over 200 active users, bringing accessibility, adaptability, and potential to maximise efficiencies.

What are the benefits of SunSystems for your business?

Make better, faster decisions with critical information delivered to your desktop or mobile device

- Rapid reporting - helping you create ad-hoc reports in minutes
- Access your systems anytime, anywhere from your mobile device
- Seamless integration with other business applications using SunSystems' powerful integration tools
- Multi-currency and multi-company - making it the perfect two-tier solution for subsidiaries, multi-national or multi-site offices
- Specialised for your industry - featuring specific functionality designed for micro-verticals

NOTE: While Infor SunSystems is still available to implement on-premises, its latest version is SunSystems Cloud, a true SaaS solution with automated scheduled updates and an attractive subscription-based pricing model.

With its innovative multi-tenant cloud platform, SunSystems Cloud provides the benefits of an agile and cost-effective operational model. By offering scalability and a secure environment, organisations can benefit from technology that simplifies financial operations and eliminates the need for expensive hardware investments.

Testimonial

“SunSystems plays a massive role within the organisation, we couldn't function without it. We're able to produce reports for each fund by region, project, applicant, and phase which is key for us and SunSystems allows us to do this with ease.”

– Salix Finance

Spend less time on manual tasks

When you can see the impact of all your financial transactions as well as the trends that may affect your business tomorrow, you will have a potent strategic advantage that benefits every aspect of your organization. Make better decisions:

Financial management – Get immediate access to all finance and accounting information so you can make fast and effective decisions about all aspects of financial management. Meet change with confidence with SunSystems' flexible configuration handling even the most complex requirements and GAAP standards.

Performance management – Simplify your budgeting, forecasting, and other financial planning processes with SunSystems' budgeting and planning solutions. Turn your data into meaningful information, and then deliver it to the right people, in the right format, at the right time.

Purchase management – Get a tighter grip on your purchasing activities with SunSystems' complete web-based spending control and management solution, which you can deploy to large numbers of employees. Not only can your employees manage their own purchasing requirements, you can define rules and workflows that automate and enforce corporate policies, improving efficiency and saving money.

Professional services automation – You will be able to handle project accounting, resource management, billing, and web-based time and expense management. That means you will improve staff utilization, optimize cash flow, and increase your revenue.

Document management – With just a few clicks of your mouse, you can automatically capture, authorize, and archive business documents such as invoices, purchase orders, and statements. You will save time, money, and storage space, and comply with increasing regulations. Not only that, you will support your company's green initiatives.

Integration platform – You will be able to integrate SunSystems with other enterprise and financial systems you already have, because of SunSystems' open architecture and unparalleled interoperability—especially valuable if you need a flexible financial solution to help you cope with unpredictable business conditions.
